How to Turn a Serious Diagnosis into New Life and Dignity

For caregivers as well as the general population, to teach about the essence of the human person, namely the psyche, as an important — if not the most important — health factor.

For builders of the Culture of Life, for added credibility and efficiency, to learn how to live centered on the essentials so that one may radiate life.

For those experiencing illness or helping those who are, to foster the best experience possible of illness so as to optimise one's prognosis (outlook).
